F. P. EISENBEGLER
President

September 20, 1980

Dear Fellow Employee:

Our new coastal tanker was christened the "M.V. NORTHERN SUN" in Houston, Texas, today.

To help celebrate the christening of this 2,635 deadweight ton vessel, I am enclosing a commemorative envelope that we have designed for this special occasion.

The enclosed envelope commemorates not only the ship's christening, it also serves to symbolize Sun's long-standing and wide-ranging ties with the state of Texas. (The three-cent stamp affixed to the commemorative cover was originally issued in 1945 to honor 100 years of Texas statehood.)

The christening of the "NORTHERN SUN" is further evidence of the changes that are transforming Sun Transport from an in-house transportation service to a major U.S. liquid bulk carrier.

Through the sustained efforts of everyone in this company, we have been able to translate these changes into accelerating growth and increasing profitability for Sun Transport.

If we are to ensure our future progress and the ongoing success of Sun Transport, we will have to continue to provide tomorrow's customers with "more of the same" professional ocean transport service which has been our trademark. The addition of the "M.V. NORTHERN SUN" to our fleet is another step forward toward meeting our commitment of modern, efficient service for our customers and continued contribution to the Sun Company.

Sincerely,

F. P. Eisenbregler
